

## ARIZONA JOURNAL-MINER

DAILY AND WEEKLY.

Published by Arizona Journal-Miner Company.

J. C. Martin, Editor and Manager.

MEMBER OF ASSOCIATED PRESS

Official Paper City of Prescott.

Entered in the Postoffice at Prescott, Arizona, as Second-Class Matter.

THE DAILY JOURNAL-MINER is published every day in the year except Sundays and legal holidays.

THE WEEKLY JOURNAL-MINER is published every Wednesday morning at Prescott, the County Seat of Yavapai County.

THE EASTERN OFFICES of this paper are at 24 Temple Street, New York City, and 8, Express Building, Washington, D. C.

THE JOURNAL-MINER will be continued until ordered stopped. Subscribers are requested to pay in advance. Subscribers who desire the paper stopped at any time are requested to send notice to this office and pay up the amount due.

TERMS: Daily, per year in advance \$8.00

Weekly, per year in advance \$5.00

Three months \$1.50

St. Louis Globe-Democrat \$2.00

San Francisco Chronicle \$2.00

Philadelphia Press \$2.00

WORD TO OUR FRIENDS.

The Journal-Miner is adding new subscribers to its list every day.

The people of Prescott appreciate the fact that the Journal-Miner is striving hard to give them the best paper that can be published in the city and are coming to the aid of the management with their patronage. Such favors are appreciated and the paper assures its patrons and friends that it will proportion to their legitimate support will the paper be improved and become a power in the upbuilding and advancement of the city and community. No support is asked as a charity offering, but if you believe the paper is worthy of your business support and can give your patronage, you are kindly asked to extend that support. Your job work will be done in a neat and creditable manner and at living prices. Your advertisements will reach a large number of people who reside in this section and who spend their money with the business of this city. The Journal-Miner, therefore, you can tell them, is the Journal-Miner columns the advantages you offer in your line. The columns of the paper are filled with the news of this vicinity including the mining transactions and developments of this great mining center, as well as a telegraphic report of the principal happenings of the outside world. If these are any inducements to you to lend your aid to the paper the same will be appreciated. If you are satisfied with the improved condition of the paper tell your neighbor and ask him to fall into line.

LEGISLATIVE DOINGS.

The Cowan bill providing for the division of the fees of the office of the secretary of the territory arising from the recording and filing of articles of incorporation, to the territorial treasury was brought up in the house yesterday afternoon, and a hot fight ensued over it. While the bill was not passed a vote showing the respective strength of the opposing sides was taken on a motion, showing fifteen in favor of the bill and nine opposing it. Those voting favorably to its passage were:

Bernard, Collins, Cowan, Gonzales, Henry, Howell, Marlar, O'Connell, Page, Parr, Roemer, St. Charles, Webb, Williams, Woolf, (the speaker).

Those opposed to its passage are Barrow, Herr, Henry, Ingalls, Morrison, Lamont, Rowe, Schilling, Whiteside—9. Rowe tried to amend it making it inoperative during the term of the present incumbent, but failed. Whiteside tried to amend doubling the fee giving the secretary one-half and the territory one-half. This also failed. The bill was finally sent to the enrolling and engrossing committee. The council did not transact any business.

The mine inspector bill has been defeated in the house by a vote of fourteen to nine today following another plank of the democratic platform and thus fulfilling the prediction made last fall by the Journal-Miner. The house passed a bill providing for the improvement of the agricultural stations, and for the holding of farmers' institutes. It provides for a bond issue of \$11,000 of which \$8300 is to be spent on the station and \$2700 the institute. Fifteen votes were cast in favor of it and seven against it.

The manual training school for Prescott was also passed in the house by a vote of fifteen to seven. St. Charles and Parr both bitterly opposed the passage of this bill. Another bill of similar import providing for a school on similar lines in Graham county was also up for consideration, when St. Charles opposed it as bitterly as he did the other one making charges against Webb, to which the latter replied, passing the lie up to St. Charles. Apologies followed later. The bill was passed by a vote of 14 to 8.

Among the new bills introduced was an incipient prohibition bill by Rowe, prohibiting the sale of liquors near public lands, and another bill, O'Connell introduced a bill limiting the salaries of clerks of the court to \$1000 per year.

A bill providing for another company of territorial rangers met with defeat in the house, and the typographical union bill was also subjected to legislative graveyard.

The house has killed five council bill providing for redistricting the territory for judicial purposes, by indefinitely postponing it, the vote being 7 to 7.

Short sessions continue the order of the day in the council. Another bill has found its way to the governor, being the one providing for an official coroner.

SEWED UP HIS HEART.

One of the most remarkable cases connected with surgery, is reported from St. Louis, where surgeons sewed up a boy's heart and the boy is now reported entirely recovered.

The boy is named Spiller. On January 15 he attempted to commit suicide, by shooting himself in the left lung, the bullet penetrating the heart. He was removed from his residence to the city hospital, and was rapidly bleeding to death. The flow of blood was checked by the hospital staff, and the remarkable surgical operation of sewing up a human heart was undertaken by Dr. Rasseur.

To do this, the physician was obliged to cut away a section of the affected ribs, and also to cut through the lung, raising it up to reach the pericardium. The bullet hole found there was enlarged two inches, with a pair of silver scissors, and the surgeon inserted his fingers in the aperture thus made, drawing the heart to the front wall of the pericardium.

With the delicate organ held in the palm of his hand, he proceeded deftly to sew up the gaping hole. The stitches were taken, the blood spurting out fresh at each stitch of the needle. In a short time the sutures were made, and the throbbing member put back into its normal position. The wound in the heart was one and a half inches long, one-half inch deep, and three-eighths of an inch deep.

The operation gave the patient little pain, and, contrary to the general expectations of surgeons throughout the city, proved beneficial from the outset, as the youth improved steadily, and his recovery is now considered complete.

A VALUABLE INVITATION.

Pasadena, California, has sent an invitation to President Roosevelt to visit that city which is the most unique as well as the most valuable ever received by him.

It was gold and its exact value is not known. The invitation is a key of solid gold, and around the stem of the key is a splendidly engraved crown. The key is emblematic of that of the crown and is emblematic of the Indian name "Crown of the Valley." The key is four inches long and is a representation of the mammoth keys of olden days. It is attached to a small piece of native wood that lies in the bottom of a specially made box. The box is of orange wood with hinges of gold. On the outside are gold trimmings at the corners with gold plate in the center inscribed as follows:

"Presented to Theodore Roosevelt, president of the United States, by resolution of the citizens of Pasadena, Cal., January 6, 1903."

On the inside of the lid of the box is the following inscription:

"Pasadena, Greetings to the President."

Then follows the formal invitation for the visit, signed by members of the city council and members of trade organizations of the city.

The president considers the invitation one of the prettiest he has ever seen, and certainly the most beautiful and expensive he has yet received.

When the invitation was presented, he exclaimed, "Well, by George, isn't that a Jim Dandy!" Then he called his secretary and told him to make a note of the fact that Pasadena must be included in the itinerary of the western trip.

The Journal-Miner has been informed by two thoroughly reliable men that there are several heads of dead cattle lying along the creek just a short distance above the Del Rio pumping plant. This matter should be looked into by the proper authorities at once and if such is the case the carcasses should be removed immediately so as not to contaminate the water which is consumed by the residents of this city. The carcasses are on the old Baker and Campbell ranch, and one of the men on the ranch said he had tried to haul them away but had only an old plug of a horse and could not do it. The health of this city demands that such matters be watched closely and not allowed to remain a moment longer than can possibly be avoided.

Every day furnishes additional evidence of the correctness of the Journal-Miner's assertions last fall that the democratic party was not sincere in its platform pledges. Only one promise has so far been redeemed, and that only partially, the passage of the eight hour law. The bill for the repeal of the tax exemption law was mercilessly slaughtered yesterday by being indefinitely postponed, only one vote being recorded in its favor. The bill compelling barber shops to close on Sunday was passed by the house, but should it pass the council and become a law would be invalid, being special legislation.

With the close of the fifty seventh congress all unfinished legislation expired. Before admission of any of the territories can be accomplished, a new bill will have to be introduced, and be passed in the house. There will be many changes in the personnel of the house, while there will also be many changes in the senate. It is a safe prediction to make that no admission bill will be passed until after the election in 1904.

A bill has passed the lower house of the Missouri legislature providing that upon the discharge of any employee of any corporation doing business in that state it is the duty of such corporation to provide such employee with a statement in writing setting forth the cause that led to such discharge. Violations of the act are made punishable by a fine of not less than \$50 nor more than \$100.

By a vote of ninety four to forty six, the lower house of the Maine legislature has refused to re-submit the prohibition liquor law to a vote of the people. The majority is willing to permit the law to remain as it is. It was passed over fifty years ago.

Mark Smith redeemed his statehood promise at the exact value placed on it by the Journal-Miner.

I. D. Sankey, the singing evangelist, has become blind.

## SPECIAL SESSION

City Council Holds a Special Session Yesterday Afternoon and Transacts Important Business.

A Resolution Passed Calling For a Special Election on Proposition of Bond Issue to Extend Water System.

Pursuant to Monday night's adjournment the city council met in special session in the city council chambers at 3 o'clock, a full board being present. The first matter that was taken up was a resolution favoring the passage of the council bill in the legislature to establish a manual training school in Prescott. Mr. Norris addressed the council on the resolution, explaining that the bill carried with it an immediate appropriation of \$10,000 to be expended in fitting up and equipping what is now the high school building in Prescott, so that the new school could be opened at the beginning of the school year next fall. It would also carry an appropriation of about \$8000 per year to maintain the school. He stated that the bill had been reported from the committee and recommended to pass, and urged the city council to pass the resolution favoring the measure. On motion the mayor was unanimously directed to forward such a resolution at once to the legislature.

Regarding the disputed matter of city attorney Mr. Norris said on his own behalf that he did not want to be a bone of contention over which the council and mayor should waste valuable time in fighting and asked the council and mayor, in the name of harmony and for the good of the city, to hold an executive session and come to an understanding on the matter as soon as possible.

The matter of extra lights for the city, Mr. Glas, of the Prescott Electric company, was present and explained to the council that the company had greatly increased its capacity and was now ready to furnish the city with extra lights. Also that the price to the city had been reduced so that the twenty proposed lights would only cost the city about the same that fifteen would have cost heretofore. New lights were then ordered placed at the following places:

Corner Gurley street and Weber avenue; Grove street and Weston avenue; Summit avenue and Pleasant street; Granite and Gurley streets; Marina and Willis streets; Carlton and Pleasant streets; Pleasant and Goodwin streets; Mr. Vernon avenue and Goodwin streets; Gurley and Alarcon streets; Carlton and Marina streets.

Henry Stutman appeared before the council in protest to the privilege which had been granted to a Mr. Norris by the council to run a lunch wagon on the streets. He said a large number of the merchants and business men were opposed to it. The matter was taken under further advisement.

The principal business of the session was then taken up, by resolution No. 2, calling for a special election in the city for the purpose of voting on the proposition for issuing \$100,000 five to fifty year five percent bonds for the purpose of extending and repairing the water and sewer systems of Prescott. The resolution was read and discussed and on motion was referred to Attorney E. E. Ellinwood for his legal opinion as to its correctness.

After a discussion of the matter of the opera house license and also of the new law of leaving the city ordinance printed in book form, the council adjourned till 3 o'clock this afternoon.

MAYOR'S ADDRESS.

Wants Harmony in Council, But Makes No Overtures for Conference.

The little speech delivered by Mayor Burke at the last meeting of the city council and the subsequent colloquy between him and members of the city council, as taken down by the Journal-Miner, taken to the meeting by him, follows:

At the last meeting of the common council, I submitted for the consideration of the council, the names of some gentlemen that I asked to be appointed to offices, and the council, in their judgment, deemed it advisable not to confirm any of the appointments that I made.

I certainly have the interests of the City of Prescott at heart, I want the assistance of the council, and fully realize that the council and mayor must work in harmony and without a unit we cannot expect to handle the affairs of the city in the interests of the taxpayers. I had no personal motive or desire from a selfish standpoint when I submitted any of the names of the gentlemen I asked to have appointed; it is true, I did not consult with any of the members of the council, but I referred to the appointments that I asked them to confirm. I did not intend to be discourteous to the council and I thought that from the time I was elected to office up to the time I assumed the duties thereof, that if the council had any suggestions or will to listen to the suggestions of the council, but no suggestions were offered. I was thrown upon my own resources and from that I had the right to believe to be that the best interests of the taxpayers of the City of Prescott that a change in the names of the council be to the best interests of the taxpayers.

Insofar as the city attorney is concerned, it is not advisable to select or confirm the appointment of Mr. Norris, whom I believe to be a gentleman of integrity, honesty and ability, with the consent of the council I will submit another name, but I want to have an expression from the council as to whether you will confirm the appointment of the gentleman I will name before you vote upon it. I want nothing but harmony, as I said before we cannot progress in the upbuilding of the city of Prescott, unless we have harmony between the council and the mayor. I am ready to proceed.

At this point Mr. Mulvenon interrupted the mayor in his address by asking him to name the gentleman he intended submitting for appointment as city attorney.

Mayor Burke: Mr. E. E. Ellinwood is the name of the gentleman I

## ADDS NEW FEATURE

Shumate & Raible Are Now Manufacturing Their Own Candies and Manufacturing For Local Trade.

Important Feature to Be Added to Their Soda Fountain—Capacity For Business Greatly Increased.

It is doubtful if there is another firm in the whole territory of Arizona that can show a greater percentage of growth and improvement than the firm of Shumate & Raible. There is scarcely a month that there is not some improvement made in the equipment of the store for the better service of the patrons of the firm. The latest improvement in this line is the addition of a candy factory which has been added not only for his own convenience but a wholesale department for the manufacture of candy for the local trade. In order to put in this department it was necessary to procure the basement under his store, as the store room was already full to overflowing with goods. This basement is the full size of the store room proper being 25x80 feet.

The front of the basement has been fitted up for the candy factory and is equipped with every convenience needed for the manufacture of those delicious chocolates, bon bon, taffies, ice cream, stick candies of all kinds, etc.

In the rear of the candy department is the ice cream manufacturing department. This part of the business has also been enlarged to meet the demand for manufacturing all kinds of ice creams and ices has been greatly augmented. A water motor has been attached to the freezers and now all the ice cream man has to do is to mix up his ingredients, turn the water into the motor and in about five minutes he has his cream ready to serve. The capacity of the plant now is about 150 gallons of cream in ten hours.

Messrs. Shumate & Raible manufacture all their own syrups both for the fountain and the ice creams and the greatest care is exercised that everything shall be of the best quality.

By attaching the new feature which will soon be in operation will be the automatic carbonator for the soda fountain. This has already been ordered and as soon as it arrives it will be placed in position and attached to the fountain. This apparatus will be placed in the front show window of the store where it may be seen at all times. By attaching the carbonator to the city water pipe and also attaching a current of electricity the machine is ready for action and will automatically keep the fountain ready for business without further attention.

Oliver Jordan, who has been with the firm for the past year, will have full charge of this department as well as the manufacture of the candies and he has given ample proof of long ago that he stands at the head in his line of work, and Prescott people always know that when they patronize Shumate & Raible they are going to get the best of everything that can be produced in their line of business.

"TWO HOURS AT HOME."

A Very Clever and Most Interesting Entertainment Given Last Night.

Prescott people who failed to attend last night's entertainment at the opera house missed one of the treats of the season, and one which is not often offered them. While the company consisted of only two performers, Mr. Gavin Spence and Miss Flora MacDonald, interest never flagged from the rise of the curtain to the drop at the close of the entertainment. The title of the entertainment given was "Two Hours at Home." This of course is very appropriate for the Scottish people who attend, but to the writer who cannot claim that honor, although having a strain of Scotch blood in his veins, it was a "Two Hours" very pleasant visit, with a couple of priceless Scotch entertainments at the place.

"Two hours" longer the pleasure would have been just doubled.

Both Mr. Spence and Miss MacDonald certainly know how to reach the hearts of their audience and their every number was greeted with the most enthusiastic applause.

In a twenty year residence in Prescott, the writer has never seen such a condition of the streets so far as accommodations for pedestrians are concerned as exist at present. The city has a chain gang at work at present and it does seem that they could not be put to a better use than to clear the streets of mud and filth. Every street crossing between East blood in his veins, it was a "Two Hours" very pleasant visit, with a couple of priceless Scotch entertainments at the place.
